

Labour Market Statistics, January 2013

Coverage: UK

Date: 23 January 2013

Geographical Area: UK and GB

Theme: Labour Market

For September to November 2012:

- The employment rate for those aged from 16 to 64 was 71.4%, up 0.1 on June to August 2012 and up 1.1 on a year earlier. There were 29.68 million people in employment aged 16 and over, up 90,000 on June to August 2012 and up 552,000 on a year earlier.
- The unemployment rate was 7.7% of the economically active population, down 0.1 on June to August 2012 and down 0.7 on a year earlier. There were 2.49 million unemployed people, down 37,000 on June to August 2012 and down 185,000 on a year earlier.
- The inactivity rate for those aged from 16 to 64 was 22.5%, unchanged on June to August 2012 but down 0.7 on a year earlier. There were 9.03 million economically inactive people aged from 16 to 64, down 13,000 on June to August 2012 and down 253,000 on a year earlier.
- Total pay (including bonuses) rose by 1.5% compared with September to November 2011. Regular pay (excluding bonuses) rose by 1.4% compared with September to November 2011.

In this Bulletin

This Statistical Bulletin contains the latest estimates for employment, unemployment, economic inactivity, claimant count, average earnings, labour productivity, vacancies and labour disputes. The estimates are used by a wide range of users, particularly across government and the media, to monitor developments in the labour market. All estimates discussed in this Statistical Bulletin are for the United Kingdom and are seasonally adjusted except where otherwise stated. Most of the figures discussed in this Statistical Bulletin are obtained from surveys of households or businesses and are therefore estimates, not precise figures. See the Sampling Variability and Seasonal Adjustment sections of this Bulletin for further details. This Statistical Bulletin is accompanied by [data tables in spreadsheet format](#). The pdf version of this Statistical Bulletin includes 24 summary data tables. See the Data Tables section of this Statistical Bulletin for further details.

Regional estimates are available from the [Regional Labour Market release](#).

New this month:

- Labour Force Survey and Average Weekly Earnings estimates for September to November 2012.
- Claimant count estimates for December 2012.
- Vacancies estimates for October to December 2012.
- Labour disputes estimates for November 2012.

Summary of labour market statistics published on 23 January 2013

A [short video](#) explaining this story is available.

Between June to August 2012 and September to November 2012:

- the number of people in full-time employment increased by 113,000,
- the number of people in part-time employment fell by 23,000,
- the number of unemployed people fell by 37,000, and
- the number of economically inactive people, aged from 16 to 64, fell by 13,000.

Between September to November 2007 and September to November 2012:

- the number of people in full-time employment fell by 341,000,
- the number of people in part-time employment increased by 660,000,
- the number of unemployed people increased by 854,000, and
- the number of economically inactive people, aged from 16 to 64, fell by 75,000.

Chart 1: Changes in number of people in the labour market between September to November 2007 and September to November 2012, seasonally adjusted

Download chart

[XLS](#) [XLS format](#)

(37 Kb)

The employment rate for those aged from 16 to 64 for September to November 2012 was 71.4%. This was up 0.1 percentage point on June to August 2012 and up 1.1 on a year earlier, but it was lower than the pre-recession peak of 73.0% recorded for March to May 2008. The number of people in full-time employment aged 16 and over increased by 113,000 between June to August and September to November 2012 to reach 21.57 million but the number of people in part-time employment fell by 23,000 to reach 8.11 million. Compared with a year earlier:

- the number of men in full-time employment increased by 237,000,
- the number of men in part-time employment increased by 95,000,
- the number of women in full-time employment increased by 77,000,
- the number of women in part-time employment increased by 144,000, and
- the total number of people in employment increased by 552,000, the largest annual increase since 1989.

Chart 2: Changes in number of people in employment between September to November 2011 and September to November 2012, seasonally adjusted

Source: Labour Force Survey - Office for National Statistics

Download chart

[XLS](#) [XLS format](#)

(29 Kb)

The unemployment rate for September to November 2012 was 7.7% of the economically active population, down 0.1 on June to August 2012 and down 0.7 on a year earlier. The number of unemployed men aged 16 and over fell by 37,000 between June to August and September to November 2012 to reach 1.41 million, but the number of unemployed women was unchanged at 1.08 million. The number of women unemployed for up to six months increased by 26,000 to reach 571,000. This may reflect changes to the benefits system resulting in more single mothers starting to look for work (see Claimant Count section of this Bulletin for further details).

The economic inactivity rate for those aged from 16 to 64 for September to November 2012 was 22.5%, unchanged on June to August 2012 but down 0.7 on a year earlier. The number of economically inactive people aged from 16 to 64 fell by 13,000 between June to August and September to November 2012 to reach 9.03 million.

The number of people claiming Jobseeker's Allowance fell by 12,100 between November and December 2012 to reach 1.56 million.

Between July to September 2012 and October to December 2012, the number of vacancies increased by 10,000 to reach 494,000. This is the highest number of vacancies since October

to December 2008, but it is 200,000 lower than the pre-recession peak of 694,000 recorded for January to March 2008.

Between September to November 2011 and September to November 2012, total pay for employees in Great Britain rose by 1.5%. This annual growth rate for earnings was lower than the increase of 2.7% in the Consumer Prices Index between November 2011 and November 2012.

Employment

Employment measures the number of people in paid work and differs from the number of jobs because some people have more than one job. A comparison between estimates of employment and jobs is available in an [article published on the website](#) on 12 December 2012. A [short video](#) explaining the basic labour market concepts of employment, unemployment and economic inactivity is available on the ONS YouTube channel. Employment estimates are available at Tables 1 and 3 of the pdf version of this Statistical Bulletin and at [data tables A02 \(1.23 Mb Excel sheet\)](#) and [EMP01 \(1.25 Mb Excel sheet\)](#).

The employment rate for those aged from 16 to 64 was 71.4% for September to November 2012, up 0.1 percentage points from June to August 2012 and up 1.1 from a year earlier. Chart 3 shows the employment rate for those aged from 16 to 64 for the last five years.

Chart 3: Employment rate (aged 16 to 64), seasonally adjusted

Source: Labour Force Survey - Office for National Statistics

Download chart

XLS [XLS format](#)

(32.5 Kb)

The employment rate for men aged from 16 to 64 was 76.6% for September to November 2012, up 0.1 percentage points from June to August 2012. The corresponding employment rate for women was 66.3%, up 0.2 from June to August 2012.

The number of people in employment was 29.68 million for September to November 2012, up 90,000 from June to August 2012 and up 552,000 on a year earlier. The number of people in full-time employment was 21.57 million for September to November 2012, up 113,000 from June to August 2012. The number of people in part-time employment was 8.11 million, down 23,000 from June to August 2012.

Between June to August 2012 and September to November 2012, as shown in Chart 4:

- the number of employees increased by 77,000 to reach 25.20 million,
- the number of self-employed people increased by 7,000 to reach 4.20 million,
- the number of unpaid family workers fell by 1,000, and
- the number of people on government supported training and employment programmes classified as being in employment (excluding those classified as employees and self-employed) increased by 7,000 to reach 165,000.

Chart 4: Changes in people in employment between June to August 2012 and September to November 2012, seasonally adjusted

Source: Labour Force Survey - Office for National Statistics

Notes:

1. Unpaid family workers are people who work in a family business who do not receive a formal wage or salary but benefit from the profits of that business.
2. The Government supported training and employment programmes series does not include all people on these programmes; it only includes people engaging in any form of work, work experience or work-related training who are not included in the employees or self-employed series. People on these programmes NOT engaging in any form of work, work experience or work-related training are not included in the employment estimates at all; they are classified as unemployed or economically inactive.

(29 Kb)

Public and private sector employment

Public sector employment measures the number of people in paid work in the public sector. The public sector comprises central government, local government and public corporations. Estimates of public sector employment are obtained from information provided by public sector organisations. Private sector employment is estimated as the difference between total employment, sourced from the Labour Force Survey, and public sector employment. Public and private sector employment estimates are available at Tables 4, 4(1) and 4(2) of the pdf version of this Statistical Bulletin and at [data tables EMP02 \(74.5 Kb Excel sheet\)](#), [EMP03 \(58 Kb Excel sheet\)](#) and [EMP04 \(39.5 Kb Excel sheet\)](#).

The number of people employed in the public sector was 5.75 million in September 2012, down 24,000 from June 2012. The number of people employed in the private sector in September 2012 was 23.86 million, up 65,000 from June 2012.

Between September 2011 and September 2012, the number of people employed in the public sector fell by 324,000 and the number of people employed in the private sector increased by 823,000. These large annual movements reflect the reclassification of some educational bodies from the public sector to the private sector. See Background Notes to the [September 2012 Statistical Bulletin](#) for further details. As shown in Chart 5, excluding this reclassification, the number of people employed in the public sector fell by 128,000 between September 2011 and September 2012 and the number of people employed by the private sector increased by 627,000. Further information on public sector employment is available in the [Public Sector Employment release](#) published on 12 December 2012.

For September 2012 within the public sector, as shown in Chart 6:

- 1.55 million people were employed in the National Health Service, down 3,000 from June 2012,
- 1.08 million people were employed in public administration, down 11,000 from June 2012,
- 1.49 million people were employed in education, down 8,000 from June 2012, and
- 444,000 people were employed in HM Forces and the police, down 6,000 from June 2012.

(29.5 Kb)

Employment by country of birth and nationality, not seasonally adjusted (first published on 14 November 2012)

ONS publishes estimates of employment by both nationality and by country of birth. The number of non-UK born people in employment is greater than the number of non-UK nationals in employment, as the non-UK born series includes many UK nationals. The estimates relate to the number of people in employment rather than the number of jobs. These statistics have sometimes been incorrectly interpreted as indicating the proportion of new jobs that are taken by foreign migrants. Estimates of employment by country of birth and nationality are available at Tables 8 and 8(1) of the pdf version of this Statistical Bulletin and at [data tables EMP05 and EMP06 \(169.5 Kb Excel sheet\)](#).

The number of UK nationals in employment was 27.07 million for July to September 2012, up 455,000 from a year earlier. The number of non-UK nationals in employment was 2.62 million, up 75,000 from a year earlier.

The number of UK born people in employment was 25.42 million for July to September 2012, up 317,000 from a year earlier. The number of non-UK born people in employment was 4.27 million, up 208,000 from a year earlier.

Chart 7: Employment by country of birth and nationality, changes between July to September 2011 and July to September 2012, not seasonally adjusted

(25 Kb)

Actual hours worked

Actual hours worked measures the number of hours worked in the economy. Hours worked estimates are available at Tables 7 and 7(1) of the pdf version of this Statistical Bulletin and at [data tables HOUR01 \(457 Kb Excel sheet\)](#) and [HOUR02 \(1.54 Mb Excel sheet\)](#).

Total hours worked per week were 944.3 million for September to November 2012, up 7.8 million from June to August 2012 and up 21.2 million on a year earlier. Chart 8 shows total hours worked for the last five years. Average weekly hours worked for September to November 2012 were 31.8, up 0.2 from June to August 2012 and up 0.1 from a year earlier. The estimates for total hours worked and average hours worked can be affected by the arrangement of public holidays. The quarterly increase in hours worked between June to August and September to November 2012 was affected by two more public holidays than usual in the June to August period (due to the Diamond Jubilee holidays which occurred in June).

Chart 8: Total weekly hours, seasonally adjusted

Earnings

Earnings measures money paid to employees in return for work done, before tax and other deductions from pay. The estimates relate to Great Britain and include salaries but not unearned income, benefits in kind or arrears of pay. As well as pay settlements, the estimates reflect bonuses, changes in the number of paid hours worked and the impact of employees paid at different rates joining and leaving individual businesses. The estimates also reflect changes in the overall structure of the workforce; for example, fewer low paid jobs in the economy would have an upward effect on the earnings growth rate. Average Weekly Earnings estimates are available at Tables 15, 15(1) and 16 of the pdf version of this Statistical Bulletin and at [data table EARN01 \(463.5 Kb Excel sheet\)](#).

In November 2012:

- Average total pay (including bonuses) for employees in Great Britain was £472 per week.
- Average regular pay (excluding bonuses) for employees in Great Britain was £444 per week.

Between September to November 2011 and September to November 2012:

- Total pay for employees in Great Britain rose by 1.5%. This annual growth rate of 1.5% was 0.3 percentage points lower than the growth rate of 1.8% in total pay between August to October 2011 and August to October 2012.
- Regular pay for employees in Great Britain rose by 1.4%. This annual growth rate of 1.4% was 0.3 percentage points lower than the growth rate of 1.7% in regular pay between August to October 2011 and August to October 2012.

Between November 2011 and November 2012, the Consumer Prices Index increased by 2.7%. Chart 9 shows annual growth rates for earnings and prices for the last five years.

Chart 9: Whole economy average earnings and consumer prices annual growth rates

Source: Office for National Statistics

Notes:

1. This chart shows monthly estimates for the Consumer Prices Index (CPI) from November 2007 to November 2012 and three month average estimates for Average Weekly Earnings (AWE) from September to November 2007 to September to November 2012.
2. The CPI series is for the United Kingdom and is compiled from prices data based on a large and representative selection of individual goods and services. The AWE series are for Great Britain and are sourced from the Monthly Wages and Salaries Survey.
3. The AWE series are seasonally adjusted. The CPI series is not seasonally adjusted.

Download chart

[XLS](#) [XLS format](#)

(35 Kb)

Between September to November 2011 and September to November 2012:

- Total pay in the private sector rose by 1.4%, while regular pay rose by 1.5%.
- Total pay in the public sector rose by 2.0%, while regular pay rose by 1.9%.
- Total pay in the public sector excluding financial services rose by 2.2%, while regular pay rose by 2.0%.

The public and private sector growth rates from June 2012 have been affected by the reclassification of English Further Education Corporations and Sixth Form College Corporations. From June 2012 onwards these educational bodies are classified to the private sector, but for earlier time periods they are classified to the public sector. ONS estimates that, if the reclassification had not occurred, the public sector single month growth rates from June 2012 onwards would be between 0.6 and 0.8 percentage points lower and the corresponding private sector growth rates would be between 0.1 and 0.2 percentage points higher. Further information regarding this reclassification is available in an [article published on the website](#) on 31 May 2012.

Labour productivity (first published on 3 January 2013)

Labour productivity measures the amount of real (inflation adjusted) economic output that is produced by a unit of labour input (in terms of workers, jobs and hours worked). Whole economy output per worker increased by 0.6% between the second and third quarters of 2012. Whole economy unit labour costs fell by 0.1% between these quarters. Chart 10 shows percentage changes on quarter for output per worker and unit labour costs for the last five years. Labour productivity estimates are available at Table 17 of the pdf version of this Statistical Bulletin and at [data table PROD01 \(73.5 Kb Excel sheet\)](#). Further information is available in the [Labour Productivity Statistical Bulletin](#) published on 3 January 2013.

Chart 10: Output per worker and unit labour costs, percentage changes on quarter (seasonally adjusted)

Source: Office for National Statistics

Download chart

XLS [XLS format](#)

(30 Kb)

Labour disputes (not seasonally adjusted)

These estimates measure disputes (ie, strikes) connected with terms and conditions of employment. Labour disputes estimates are available at Table 20 of the pdf version of this Statistical Bulletin and at [data table LABD01 \(113 Kb Excel sheet\)](#).

In November 2012, there were 9,000 working days lost from 18 stoppages. In the twelve months to November 2012, there were 251,000 working days lost from 126 stoppages. Chart 11 shows cumulative twelve month totals for working days lost for the last five years.

Chart 11: Working days lost cumulative 12 months totals, not seasonally adjusted

Source: Labour Disputes Statistics - Office for National Statistics

Notes:

1. The cumulative 12 month totals from November 2011 to October 2012 were affected by a one day strike on 30 November 2011 called by several trade unions in connection with a dispute over proposed changes to pension schemes for some public sector workers.
2. There was a further one day strike on 30 May 2012 in connection with a dispute over proposed changes to pension schemes for some public sector workers.

XLS [XLS format](#)

(32.5 Kb)

Unemployment

Unemployment measures people without a job who have been actively seeking work within the last four weeks and are available to start work within the next two weeks. A [short video](#) explaining the basic labour market concepts of employment, unemployment and economic inactivity is available on the ONS YouTube channel. Unemployment estimates are available at Table 9 of the pdf version of this Statistical Bulletin and at [data table UNEM01 \(2 Mb Excel sheet\)](#).

The unemployment rate was 7.7% for September to November 2012, down 0.1 percentage points from June to August 2012 and down 0.7 from a year earlier. Chart 12 shows the unemployment rate for those aged 16 and over for the last five years. Unemployment rates are calculated, in accordance with international guidelines, as the number of unemployed people divided by the economically active population (those in employment plus those who are unemployed).

Chart 12: Unemployment rate (aged 16+), seasonally adjusted

Source: Labour Force Survey - Office for National Statistics

Download chart

XLS [XLS format](#)

(28.5 Kb)

The number of unemployed people was 2.49 million for September to November 2012, down 37,000 from June to August 2012 and down 185,000 from a year earlier. The number of unemployed men

was 1.41 million for September to November 2012, down 37,000 from June to August 2012. The number of unemployed women was 1.08 million for September to November 2012, unchanged from June to August 2012.

For September to November 2012, as shown in Chart 13:

- 1.18 million people had been unemployed for up to six months, up 8,000 from June to August;
- 423,000 people had been unemployed for between six and twelve months, down 41,000 from June to August;
- 892,000 people had been unemployed for over one year, down 5,000 from June to August; and
- 434,000 people had been unemployed for over two years, down 10,000 from June to August.

[XLS](#) [XLS format](#)

(36.5 Kb)

Young people in the labour market

Estimates for young people in the labour market are available at Table 14 of the pdf version of this Statistical Bulletin and at [data table A06 \(2.13 Mb Excel sheet\)](#).

For September to November 2012:

- There were 3.72 million 16 to 24 year olds in employment, up 12,000 from June to August.
- There were 2.58 million economically inactive 16 to 24 year olds (most of whom were in full-time education), down 27,000 from June to August.
- There were 957,000 unemployed 16 to 24 year olds, up 1,000 from June to August.

The unemployment rate for 16 to 24 year olds was 20.5% for September to November 2012, unchanged from June to August. In accordance with international guidelines, unemployment rates are calculated as the number of unemployed people divided by the economically active population (those in employment plus those who are unemployed). Increasing numbers of young people going into full-time education reduces the size of the economically active population and therefore increases the unemployment rate.

In accordance with international guidelines, people in full-time education (FTE) are included in the youth unemployment estimates if they have been looking for work within the last four weeks and are available to start work within the next two weeks. Excluding people in FTE, there were 633,000 unemployed 16 to 24 year olds for September to November 2012, down 26,000 from June to August. The corresponding unemployment rate was 18.0% of the economically active population for 16 to 24 year olds not in FTE, down 0.9 percentage points from June to August.

Chart 15: Young people (aged 16 to 24) in the labour market for September to November 2012, seasonally adjusted

Source: Labour Force Survey - Office for National Statistics

Notes:

1. FTE = Full-time education.
2. The "Not in Full-time education" series include people in part-time education and/or some form of training.

Download chart

[XLS](#) [XLS format](#)

(30 Kb)

Claimant count

The claimant count measures the number of people claiming Jobseeker's Allowance (JSA) and differs from unemployment (which measures people who meet the internationally agreed definition of unemployment). Claimant count estimates are available at Tables 10, 10(1) and 11 of the pdf version of this Statistical Bulletin and at data tables [CLA01 \(307.5 Kb Excel sheet\)](#), [CLA02 \(456 Kb Excel sheet\)](#) and [CLA03 \(68.5 Kb Excel sheet\)](#).

The claimant count for December 2012 was 1.56 million, down 12,100 from November 2012 and down 40,500 from a year earlier. Chart 16 shows the claimant count for the last five years. The claimant count rate was 4.8%, unchanged from November 2012 but down 0.1 from a year earlier.

Chart 16: Claimant count, seasonally adjusted

Source: Office for National Statistics, Work and Pensions

Download chart

[XLS](#) [XLS format](#)
(31.5 Kb)

Chart 17 shows that for December 2012, excluding a small number of clerically processed claims for which an age breakdown is not available, there were:

- 420,100 people aged from 18 to 24 claiming JSA, down 8,900 from November 2012,
- 877,800 people aged from 25 to 49 claiming JSA, down 4,200 from November 2012, and
- 255,900 people aged 50 and over claiming JSA, up 800 from November 2012.

Chart 17: JSA claimants (excluding clerical claims) by age and sex for December 2012, seasonally adjusted

Source: Office for National Statistics, Work and Pensions

Download chart

[XLS](#) [XLS format](#)

(30 Kb)

The claimant count can be affected by changes to the overall benefits system. For example, since 24 November 2008 several changes in the eligibility rules for Lone Parent Income Support (LPIS) have resulted in fewer lone parents (predominantly women) being able to claim that benefit resulting in more lone parents claiming JSA while they look for work. This has affected the claimant count since December 2008. The number of lone parents claiming JSA in Great Britain (not seasonally adjusted) increased from 9,300 in November 2008 to 150,900 in November 2012.

Another change to the benefits system which has affected the claimant count since April 2011 has been a re-assessment, by the Department for Work and Pensions, of claimants of Incapacity Benefit (IB) resulting in some people who have been declared ineligible for IB claiming JSA while they look for work. The effect of this exercise on monthly changes in the claimant count is likely to be small.

The claimant count for people claiming benefits for longer durations has also been affected by the introduction of the Work Programme in June 2011. Previous employment initiatives saw a break in individual's JSA claims, leading to an individual having a succession of shorter duration claims. Under the Work Programme individuals are more likely to remain on JSA for a single unbroken duration.

Comparison between unemployment and the claimant count

Unemployment is measured according to international guidelines specified by the International Labour Organisation (ILO). Unemployed people in the UK are:

- without a job, have actively sought work in the last four weeks and are available to start work in the next two weeks, or;
- out of work, have found a job and are waiting to start it in the next two weeks.

People who meet these criteria are classified as unemployed irrespective of whether or not they claim Jobseeker's Allowance or other benefits. The estimates are derived from the Labour Force Survey and are published for three month average time periods.

The claimant count measures the number of people claiming unemployment-related benefits; since October 1996 this has been the number of people claiming Jobseeker's Allowance (JSA). Some JSA claimants will not be classified as unemployed. For example, people in employment working fewer than 16 hours a week can be eligible to claim JSA depending on their income.

Chart 18 and the associated spreadsheet compare quarterly movements in unemployment and the claimant count for the same three month average time periods. The unemployment estimates shown in this comparison exclude unemployed people in the 16 to 17 and 65 and over age groups as well as unemployed people aged from 18 to 24 in full-time education. This provides a more meaningful comparison with the claimant count than total unemployment because people in these population groups are not usually eligible to claim JSA.

When three month average estimates for the claimant count are compared with unemployment estimates for the same time periods and for the same population groups (people aged from 18 to 64 excluding 18 to 24 year olds in full-time education), unemployment fell by 58,000 and the claimant count fell by 12,000, between June to August 2012 and September to November 2012.

Chart 18: Quarterly changes in unemployment and the claimant count (aged 18 to 64), seasonally adjusted

Source: Office for National Statistics, Work and Pensions

Notes:

1. Unemployment estimates are sourced from the Labour Force Survey (a survey of households). The unemployment figures in this chart, and the associated spreadsheet, exclude unemployed people aged from 18 to 24 in full-time education.
2. Claimant count estimates are sourced from administrative data from Jobcentre Plus (part of the Department for Work and Pensions).

(222.5 Kb)

Economic inactivity

Economically inactive people are not in employment but do not meet the internationally accepted definition of unemployment because they have not been seeking work within the last four weeks and/or they are unable to start work within the next two weeks. A [short video](#) explaining the basic labour market concepts of employment, unemployment and economic inactivity is available on the ONS YouTube channel. Economic inactivity estimates are available at Tables 1 and 13 of the pdf version of this Statistical Bulletin and at [data tables A02 \(1.23 Mb Excel sheet\)](#) and [INAC01 \(2.4 Mb Excel sheet\)](#).

The economic inactivity rate for those aged from 16 to 64 was 22.5% for September to November 2012, unchanged from June to August 2012 but down 0.7 from a year earlier. Chart 19 shows the

economic inactivity rate for those aged from 16 to 64 for the last five years. There were 9.03 million economically inactive people aged from 16 to 64, down 13,000 from June to August 2012 and down 253,000 from a year earlier.

Chart 19: Economic inactivity rate (aged 16 to 64), seasonally adjusted

Download chart

[XLS](#) [XLS format](#)

(32.5 Kb)

For September to November 2012, as shown in Chart 20:

- There were 2.22 million economically inactive students aged from 16 to 64, up 15,000 from June to August but down 56,000 from a year earlier.
- There were 2.04 million people aged from 16 to 64 who were economically inactive due to long-term sickness, down 9,000 from June to August and down 113,000 from a year earlier.
- There were 1.41 million economically inactive people who had retired before reaching the age of 65, down 20,000 from June to August and down 123,000 from a year earlier.

The fall in the number of economically inactive people who had retired before reaching the age of 65 reflects changes to the state pension age for women. The age at which women reach state pension age has been gradually increasing from 60 since April 2010, resulting in fewer women retiring between the ages of 60 and 65.

Redundancies

The redundancies estimates measure the number of people who have been made redundant or have taken voluntary redundancy. Redundancies estimates are available at Tables 23 and 24 of the pdf version of this Statistical Bulletin and at [data tables RED01 \(188.5 Kb Excel sheet\)](#) and [RED02 \(2.41 Mb Excel sheet\)](#).

For September to November 2012, 158,000 people had become redundant in the three months before the Labour Force Survey interviews, up 27,000 from June to August 2012 but down 6,000 from a year earlier. Chart 21 shows the number of people made redundant for the last five years. The redundancy rate was 6.3 per 1,000 employees, up 1.0 from June to August 2012 but down 0.3 from a year earlier.

Jobs (first published on 12 December 2012)

Workforce jobs measures the number of filled jobs in the economy. It differs from the number of people in employment as some people have more than one job. A comparison between estimates of employment and jobs is available in an [article published on the website](#) on 12 December 2012. Jobs estimates are available at Tables 5 and 6 of the pdf version of this Statistical Bulletin and at [data tables JOBS01 \(51 Kb Excel sheet\)](#) and [JOBS02 \(316.5 Kb Excel sheet\)](#).

There were 31.95 million workforce jobs in September 2012, up 43,000 from June 2012 and up 532,000 on a year earlier. As shown in Chart 22, the sector showing the largest increase in jobs between September 2011 and September 2012 was administrative and support service activities which increased by 145,000 to reach 2.59 million. The sector showing the largest fall in jobs over this period was construction which fell by 65,000 to reach 1.99 million.

Vacancies

Vacancies are defined as positions for which employers are actively seeking to recruit outside their business or organisation. Vacancies estimates are available at Tables 21, 21(1) and 22 of the pdf version of this Statistical Bulletin and at [data tables VACS01 \(46 Kb Excel sheet\)](#), [VACS02 \(221.5 Kb Excel sheet\)](#) and [VACS03 \(70.5 Kb Excel sheet\)](#).

There were 494,000 job vacancies for October to December 2012, up 10,000 from July to September 2012 and up 33,000 on a year earlier. Chart 23 shows the number of vacancies for the last five years. There were 1.9 vacancies per 100 employee jobs for October to December 2012, virtually unchanged from July to September 2012 but up 0.1 on a year earlier.

Data tables

The [Index of Data Tables](#) lists, and briefly describes, all of the regularly published labour market spreadsheets and includes hyperlinks from which the spreadsheets can be accessed.

The pdf version of this Statistical Bulletin includes 24 summary data tables. A list of these 24 tables, and the corresponding EXCEL spreadsheets, is available;

- in [html format](#), and
- in pdf format from the “Index of Tables” page in the pdf version of this Statistical Bulletin.

Revisions

Estimates for the most recent time periods are subject to revision due to the receipt of late and corrected responses to business surveys and revisions to seasonal adjustment factors which are re-estimated every month. Estimates are subject to longer run revisions, on an annual basis, resulting from reviews of the seasonal adjustment process. Estimates derived from the Labour Force Survey (a survey of households) are usually only revised once a year. Further information is available in the [Labour Market Statistics Revisions Policy \(36.7 Kb Pdf\)](#).

One indication of the reliability of the key indicators in this Statistical Bulletin can be obtained by monitoring the size of revisions. Data tables [EMP17 \(633 Kb Excel sheet\)](#), [UNEM04 \(1.57 Mb Excel sheet\)](#), [JOBS06 \(391 Kb Excel sheet\)](#) and [CLA04 \(1.54 Mb Excel sheet\)](#) record the size and pattern of revisions over the last five years. These indicators only report summary measures for revisions. The revised data itself may be subject to sampling or other sources of error. The ONS standard presentation is to show five years worth of revisions (60 observations for a monthly series, 20 for a quarterly series).

Sampling variability

[Data table A11 \(63.5 Kb Excel sheet\)](#) shows sampling variabilities, calculated on not seasonally adjusted data, for the Labour Force Survey. These sampling variability ranges represent '95% confidence intervals'. It is expected that in 95% of samples the range would contain the true value. The sampling variability of the three month average vacancies level (95% confidence interval) is around +/- 1.5% of that level. The sampling variabilities of the whole economy single month Average Weekly Earnings growth rates (95% confidence intervals) are as follows:

+/- 0.6 percentage points excluding bonuses,

+/- 0.7 percentage points including bonuses (April to November), and

+/- 0.9 percentage points including bonuses (December to March).

Seasonal adjustment

Like many economic indicators, the labour market is affected by factors that tend to occur at around the same time every year; for example school leavers entering the labour market in July and whether Easter falls in March or April. In order to compare movements other than annual changes in labour market statistics, such as since the previous quarter or since the previous month, the data are seasonally adjusted to remove the effects of seasonal factors and the arrangement of the calendar. All estimates discussed in this Statistical Bulletin are seasonally adjusted except where otherwise stated.

Relevant links

Regional and local area labour market statistics are available from the [Regional Labour Market Statistical Bulletin](#) and the associated data tables. More detailed regional and local area labour market statistics are available from the [NOMIS® website](#).

A number of short videos relating to labour market statistics are available from [NOMIS®](#).

There is an [article on the website](#) to help users interpret labour market statistics and highlight some common misunderstandings. A more detailed [Guide to Labour Market Statistics](#) is also available.

A Summary Quality Report for labour market statistics is available on the [Quality Reports for Business Statistics page](#) of the website.

[Labour Market Trends](#) was a monthly publication published by ONS which included articles about labour market statistics. Editions of [Labour Market Trends](#) are available on the website from July 2001 until December 2006 when the publication was discontinued. It was replaced by [Economic and Labour Market Review](#), which also included articles about labour market statistics. Editions of [Economic and Labour Market Review](#) are available on the website from the first edition, published in January 2007, up until the last edition published in May 2011.

Background notes

1. This month's release
There have been revisions, back to February 2011, to estimates of benefits proportions appearing at [data table BEN01 \(62 Kb Excel sheet\)](#). These revisions have resulted from taking on board the latest population estimates.
2. Next month's release
There are no significant developments planned for next month.
3. Special Events
ONS has published commentary, analysis and policy on "Special Events" which may affect statistical outputs. For full details go to the [Special Events page on the ONS website](#).
4. Publication policy
Publication dates up to the end of 2013 are available in the Background Notes to the [June 2012 edition of this Statistical Bulletin](#). A list of the job titles of those given [pre-publication access \(35 Kb Pdf\)](#) to the contents of this Statistical Bulletin is available on the website.
5. Details of the policy governing the release of new data are available by visiting www.statisticsauthority.gov.uk/assessment/code-of-practice/index.html or from the Media Relations Office email: media.relations@ons.gsi.gov.uk

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods; and
- are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed.

Source: Labour Force Survey
Labour market statistics enquiries: labour.market@ons.gov.uk

1. The Labour Force Survey (LFS) is a survey of the population of private households, student halls of residence and NHS accommodation.
2. The headline employment rate is the number of people aged 16 to 64 in employment divided by the population aged 16 to 64.
3. The headline unemployment rate is the number of unemployed people (aged 16+) divided by the economically active population (aged 16+). The economically active population is defined as those in employment plus those who are unemployed.
4. The headline inactivity rate is the number of economically inactive people aged 16 to 64 divided by the population aged 16 to 64.

Note on headline employment, unemployment and inactivity rates

The headline employment and inactivity rates are based on the population aged 16 to 64 but the headline unemployment rate is based on the economically active population aged 16 and over. The employment and inactivity rates for those aged 16 and over are affected by the inclusion of the retired population in the denominators and are therefore less meaningful than the rates for those aged from 16 to 64. However, for the unemployment rate for those aged 16 and over, no such effect occurs as the denominator for the unemployment rate is the economically active population which only includes people in work or actively seeking and able to work.

Note on headline employment, unemployment and inactivity levels

The headline employment and unemployment levels are for those aged 16 and over; they measure all people in work or actively seeking and able to work. However, the headline inactivity level is for those aged 16 to 64. The inactivity level for those aged 16 and over is less meaningful as it includes elderly people who have retired from the labour force.

Source: Labour Force Survey

1. The split between full-time and part-time employment is based on respondents' self-classification. Labour market statistics enquiries: labour.market@ons.gov.uk

2. This series does not include all people on these programmes; it only includes those engaging in any form of work, work experience or work-related training.

3. These series cover Employees and Self-employed only. These series include some temporary employees recorded in columns 13 to 19.

4. The total includes those who did not give a reason for working part-time and it therefore does not equal the sum of columns 21, 23, 24 and 25.

NOTE: Further Education Corporations and Sixth Form College Corporations in England are classified to the public sector up to March 2012 and to the private sector from June 2012. These educational bodies employ around 200,000 people and the reclassification therefore results in a large fall in public sector employment and a corresponding large increase in private sector employment between March and June 2012. Table 4(2) shows a series for public sector employment excluding financial corporations and the educational bodies. This series shows the movement in public sector employment between March and June 2012 excluding the effects of the reclassification.

Source: returns from public sector organisations

1. This series includes publicly owned financial corporations. Royal Bank of Scotland Group plc and Lloyds Banking Group plc are classified to the public sector from 13 October 2008. They are therefore included in the public sector estimates from December 2008 onwards but not for earlier periods. Further Education Corporations and Sixth Form College Corporations in England are classified to the private sector from 1 April 2012; previously they were in the public sector. They are therefore included in the public sector estimates up to March 2012 but not for later periods.

2. Estimated as the difference between LFS total employment and the data from public sector organisations.

3. LFS employment data for March refer to February-April, June refers to May-July, September refers to August-October and December refers to November-January.

4. This series excludes locally engaged staff stationed outside the United Kingdom.

5. This series excludes the Northern Ireland Civil Service.

6. These series may not exactly equal the sum of their components because each component is independently seasonally adjusted.

7. This series includes publicly owned financial corporations, excluding insurance and pension funding, as defined by Section 64 of Standard Industrial Classification 2007.

8. English further education colleges and sixth form college corporations are classified to the private sector from June 2012; previously they were in the public sector.

More detailed estimates are available in the Public Sector Employment Statistical Bulletin at

<http://www.ons.gov.uk/ons/rel/pse/public-sector-employment/index.html>

Workforce jobs enquiries 01633 456776
Sources: Employer surveys, Labour Force Survey and administrative sources

1. Workforce Jobs figures are a measure of jobs rather than people. For this reason estimates of self-employment jobs and government supported trainee jobs differ from estimates of people in self-employment and in government supported training and employment programmes shown at Table 3. The estimates for government supported trainees shown in this table exclude trainees with contracts of employment as such people are included in the estimates of employee jobs.

2. This series is not exclusively a public sector series as it includes some private sector jobs. See table 4 for estimates of public and private sector employment.

1. The claimant count measures the number of people claiming Jobseeker's Allowance.

Source: Jobcentre Plus administrative system

The level measures the number of claimants on the second Thursday of each month (the "count date").

The flows figures are collected for 4 or 5 week periods between count dates; the figures are then standardised to a 4 $\frac{1}{3}$ week month. The levels and flows are independently seasonally adjusted. For these reasons, movements in the flows do not tally exactly with movements in the levels.

2. Denominator = Claimant count + Workforce jobs.

More detailed estimates are available from Nomis® at:

<http://www.nomisweb.co.uk>

Months where there are 5 weeks between count dates; the rest are 4 week periods.

Labour market statistics enquiries: labour.market@ons.gov.uk

Source: Jobcentre Plus administrative system and HM Revenue & Customs child benefit data
Labour market statistics enquiries: labour.market@ons.gov.uk

1. Lone Parents are defined as those claiming Child Benefit for at least one child aged under 16 at the Jobseeker's Allowance (JSA) count date (second Thursday of the month) who have their marital status recorded as single, widowed, divorced or separated.
2. Age of youngest child relates to the age of the youngest child at the JSA count date.
3. These figures are not designated as National Statistics and may be subject to retrospective changes as and when the Department for Work and Pensions (DWP) receive updated Child Benefit data.
4. The number of people claiming JSA in Great Britain. These figures are different from the figures at table 10 (series BCJA) which relate to the UK. Series BCJA (shown at Table 10) and BCJG (shown above) also include clerical claims which are not used in producing the subsequent lone parent series and are therefore slightly different to JSA figures published by the DWP on similar tables in their publications. Therefore, there may be some lone parents included in the GB total which have not been included in the subsequent breakdowns.
5. Some JSA claimants have their marital status coded as "not known". Such claimants who are claiming Child Benefit for at least one child under 16 may be lone parents but are not recorded as such in the above table.

The estimates for Lone Parent claimants shown in the above table are produced a month later than the Claimant Count estimates shown at Table 10.

From 24 November 2008 most lone parents with older children are no longer entitled to Income Support if they are only claiming it because they are a lone parent. Instead those able to work may be entitled to claim Jobseeker's Allowance. This change has been introduced for most lone parents with: (i) a youngest child aged 12 or over from 24 November 2008, (ii) a youngest child aged 10 or over from 26 October 2009, (iii) a youngest child aged 7 or over from 25 October 2010. The Welfare Reform Act 2012 introduced further changes and, from 21 May 2012, lone parents are eligible to claim Income Support until their youngest child is five years old.

Further estimates of lone parents claiming JSA are available from DWP at <http://statistics.dwp.gov.uk/asd/>

Months where there are 5 weeks between count dates. All the rest are 4 week periods.

Source: Jobcentre Plus administrative system

1. The number of people claiming Jobseeker's Allowance.

Labour market statistics enquiries: labour.market@ons.gov.uk

2. Only computerised claims are analysed by age and duration on a monthly basis. The figures in column 2 onwards therefore differ from the figures in column 1 and in table 10. The differences reflect numbers of clerically processed claims, which currently amount to around 0.5 per cent of the total claimant count, and minor effects of rounding.

Months where there are 5 weeks between count dates. All the rest are 4 week periods.

Source: Jobcentre Plus administrative system

1. The number of people claiming Jobseeker's Allowance.

Labour market statistics enquiries: labour.market@ons.gov.uk

2. Only computerised claims are analysed by age and duration on a monthly basis. The figures in column 2 onwards therefore differ from the figures in column 1 and in table 10. The differences reflect numbers of clerically processed claims, which currently amount to around 0.5 per cent of the total claimant count, and minor effects of rounding.

Months where there are 5 weeks between count dates. All the rest are 4 week periods.

Source: Labour Force Survey

Labour market statistics enquiries: labour.market@ons.gov.uk

1. Not in full-time education includes people in part-time education and/or some form of training. Estimates of the number of young people who are not in employment, education or training ("NEET") cannot therefore be derived from this table.

2. People in full-time education are employed if they have a part-time job or unemployed if they are looking for part-time employment.

3. Denominator = all persons in the relevant age group for economically active, total in employment and economically inactive; economically active for unemployment.

Earnings enquiries: 01633 456773

1. Estimates of total pay include bonuses but exclude arrears of pay.

2. The figure in brackets is the percentage of whole economy employment in that sector or industry for the latest time period.

3. The three month average figures are the changes in the average seasonally adjusted values for the three months ending with the relevant month compared with the same period a year earlier.

4. From July 2009 Royal Bank of Scotland Group plc and Lloyds Banking Group plc are classified to the public sector; previously they are in the private sector.

5. Between June 2010 and May 2012 English Further Education Corporations and Sixth Form College Corporations are classified to the public sector.

Before June 2010 and after May 2012 they are classified to the private sector.

Relationship between columns: 1=3+5

1. Labour Force Survey is tabulated by region of residence.

2. Denominator = all persons aged 16 to 64.

3. Denominator = Total economically active.

4. Quarter on quarter changes at regional level are particularly subject to sampling variability and should be interpreted in the context of changes over several quarters rather than in isolation.

Labour market statistics enquiries: labour.market@ons.gov.uk

1. Workforce jobs are tabulated by region of workplace. Claimant count is tabulated by region of claimant's residence.
2. HM Forces stationed abroad are included in the UK jobs estimates but not in the regional jobs estimates.
3. Count of claimants of Jobseeker's Allowance.
4. Denominator = Claimant count + Workforce jobs.

Sources: Eurostat, national statistical offices.
Labour market statistics enquiries: labour.market@ons.gov.uk

1. The UK employment rate shown in the lower part of the table - as published by the Office for National Statistics - is seasonally adjusted; all other employment rates are unadjusted.

2. All employment rates for EU countries published by EUROSTAT (including the rate for the UK) are based on the population aged 15-64. The rates for Canada and Japan are also based on the population aged 15-64, but the rate for the US is for those aged 16-64. The employment rate for the UK published by the Office for National Statistics is based on the population aged 16-64.

5. The "Total EU" series consist of all 27 EU countries. The Eurozone figures consist of the following EU countries: Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Malta, Netherlands, Portugal, Slovak Republic, Slovenia and Spain.

6. Change on previous month except Latvia and United Kingdom as published by national statistical office (change on previous quarter).

3. Unemployment rates published by EUROSTAT for most EU countries (but not for the UK), are calculated by extrapolating from the most recent LFS data using monthly registered unemployment data. A standard population basis (15-74) is used by EUROSTAT except for Spain, Italy and the UK (16-74). The unemployment rate for the US is based on those aged 16 and over, but the rates for Canada and Japan are for those aged 15 and over. All unemployment rates are seasonally adjusted.

4. The unemployment rate for the UK published by EUROSTAT is based on the population aged 16-74 but the unemployment rate for the UK published by the Office for National Statistics is based on those aged 16 and over. There are other minor definitional differences.

Relationship between columns 1=2+3; 4=5+6

Source: ONS Labour Disputes Inquiry
Labour disputes enquiries 01633 456724

1. Estimates of working days lost and workers involved are shown to the nearest thousand. Unrounded estimates of less than 500 therefore round to zero.

2. Due to rounding the working days lost for the public and private sectors may not add up to the total working days lost.

3. The latest 12 month cumulative totals for the figures in these columns will not necessarily equal the sum of the 12 months as some disputes continue for over one month. These disputes appear in each month's data, but only once in the total.

4. These series exclude disputes which do not result in a stoppage of work, those involving fewer than ten workers or lasting less than one day unless the total number of working days lost in the dispute is 100 or more.

Labour market statistics enquiries: labour.market@ons.gov.uk

1. The redundancy rate is the ratio of the redundancy level for the given quarter to the seasonally adjusted number of employees in the previous quarter, multiplied by 1,000.
2. The redundancies levels as derived directly from the Labour Force Survey do not currently display seasonality. For this reason series BEAO is currently identical to the not seasonally adjusted series BEYV shown at Table 24.

24 Redundancies by industry¹

United Kingdom (thousands of people aged 16 and over), not seasonally adjusted

SIC 2007 sections	Total redundancies ²	Manufacturing		Construction		Wholesale & retail trade; repair of motor vehicles and motor cycles	Transport & storage, accommodation & food service activities, information & communication	Financial & insurance and real estate activities	Prof. scientific & technical activities, admin & support service activities	Public Administration etc., education, human health and social work activities ³	Total services ⁴

Labour market statistics enquiries: labour.market@ons.gov.uk

1. The estimates in this table are for calendar quarters only whereas the estimates at Table 23 are for rolling three-monthly time periods.
2. The total series includes those people who did not state their industry. The series also includes SIC 2007 categories A (Agriculture, forestry and fishing), B (Mining and quarrying), D (Electricity, gas, etc.) and E (Water supply, sewerage, etc.). These sectors are not shown separately in this table as the sample size is too small to provide reliable estimates. See footnote 2 at Table 23.
3. Includes both public and private sectors.
4. Other Services are not shown separately in this table as the sample size is too small to provide reliable estimates.
